### REASONS FOR ALLOWANCE

Henderson, W., Annals of Internal Medicine, is cited to show the prior art recognizes the role of 5-lipoxygenase in the etiology of inflammation. In particular, see page 689, where specific inflammatory pulmonary disease states or conditions, such as asthma, allergic rhinitis and cystic fibrosis, occur through the arachidonic acid cascade. Inhibition of 5-lipoxygenase cascade products is clearly shown to be beneficial in treating said pathologies. Henderson does not teach the administration of the specific benzoxazole derivative that is instantly claimed.

Accordingly, claim 2 and 10 are allowed in view of the contemporary knowledge of the art.
